

A 92.116:1 (6-1962)
HATCHERY PRODUCTION
June 1962

UNIV. OF FL. LIB.
DOCUMENTS DEPT.

July 16, 1962

Chick Production

U.S. DEPOSITORY

Hatcheries produced 226,982,000 chicks during June--down 2 percent from June 1961 according to the Crop Reporting Board. Production of broiler-type chicks totaled 189,424,000--down 4 percent from June last year. Eggs in incubators on July 1 indicate a smaller hatch of broiler-type chicks during July 1962 than in July 1961. The cumulative hatch of broiler-type chicks during the first 6 months of 1962, at 1,146,249,000, was down 3 percent from this period in 1961. Egg-type chick production in June totaled 37,558,000--up 9 percent from June 1961. The cumulative hatch of egg-type chicks January through June totaled 365,992,000--down 7 percent from the hatch during these months in 1961. Most of the decrease occurred in the West North Central States where the egg-type chick hatch January through June 1962 was down 20 percent from same period in 1961. Other decreases from this 1961 period were 11 percent in the West South Central, 5 percent in the East North Central, and 4 percent in the mid-Atlantic and Mountain States. These decreases were partially offset by increases of 8 percent in the West, 6 percent in the South Atlantic, 3 percent in the New England and 1 percent in the East South Central States. Eggs in incubators on July 1 indicate that the egg-type hatch in July 1962 will be larger than in July 1961.

Poult Production

June poult production was down 8 percent from June 1961. Compared with June 1961 the hatch of heavy white breed poults at 4,618,000 was down 7 percent. Other heavy breeds (mostly broad-breasted bronze) totaled 8,976,000--down 5 percent and light breeds at 1,544,000 were down 21 percent. The cumulative hatch of turkey poults during the first 6 months of 1962 totaled 81,068,000--down 17 percent from these months in 1961. The cumulative hatch of heavy white breeds was down 6 percent, other heavy breeds down 19 percent and light breeds down 35 percent. Eggs in incubators July 1 indicate that the hatch of heavy and light breeds in July will be smaller than in July 1961.
